Deliverable #5: Final Project
December 4, 2016

Team Phoenix FHIR

Project: FHIR Identity Masking

Name	Primary Team Role	GT Username	Preferred Email
George Lucas	Developer	glucas8	glucas@gatech.edu
Lucas Sturnfield	Project Manager/QA	lsturnfield3	sturnfie@gatech.edu
Aaron Ford	Developer / QA	aford39	fawkes@gatech.edu
Christine Feeney	Developer / PM	cfeeny6	christine.feeney@gatech.edu

GT Github Repository:

<https://github.gatech.edu/gt-hit-fall2016/FHIR-Identity-Masking/>

To get started use the following five easy steps

1.) Clone the git repository using:

\$: git clone <https://github.gatech.edu/gt-hit-fall2016/FHIR-Identity-Masking/>

2.) Install [Node.js](https://nodejs.org/en/)

Follow the directions included on the node.js website.

3.) From the project root directory, change directory to ./Final Project/Final Application/Application, you should see a file called **package.json**

Execute the following command to install project dependencies

\$: npm install

4.) Execute the following command to start the node server

\$: node server.js

5.) Navigate to the following URL in any web browser in order to connect to your newly running server

<http://localhost:1338>
