

## Team DNA – FHIR Interface to Directory of Clinicians

GitHub Repo	<a href="https://github.gatech.edu/gt-hit-fall2016/FHIR-Interface-to-Directory-of-Clinicians">https://github.gatech.edu/gt-hit-fall2016/FHIR-Interface-to-Directory-of-Clinicians</a>
Team Slack Channel	<a href="https://dna-cs6440.slack.com/">https://dna-cs6440.slack.com/</a>
Project sponsor	Jeff Duncan, PhD. Utah Department of Health jduncan@utah.gov
Domain	Customer facing application.

### Team information

Name	GT account	Preferred email	Roles
Aaron Higdon	ahigdon3	ahigdon3@gatech.edu	Documentation
Dan Abel	eabel3	dan.abel@ymail.com	Management, Development
Dan Frakes	dfrakes3	dpfrakes@gmail.com	Development
David Vinegar	dvinegar3	dbvinegar@email.wm.edu	Development, QA
Nate Smith	nsmith82	nate265@gmail.com	Development, QA

### GitHub listing

File	Purpose
Project Proposal.docx	This is the original project proposal.
Readme.md	Project readme file. How to deploy and build project.
bulkUpload.csv	Sample data provided by Jeff Duncan, project sponsor.
Final Project (Directory)	A place to store files relating to the final deliverable.
dao (Directory)	Contains the main dao objects as well as constants.
database (Directory)	Contains Java code relating to database as well as .sql code. This includes the base DAO object and the database factory.
fhir (Directory)	Contains JAXB bindings as well as XSD files.
service (Directory)	Contains code for upload service. Also code to find by license number (this is mostly for proof of concept).

**NOTE:** The directories listed above have several levels of subdirectories to comply with standard Java naming-conventions (for packages). However, these directories are mostly empty and therefore not listed here.
