

# FHIR Interface to Directory of Clinicians

---

## Special Instructions

### Uploading Test Data

The application includes a webapp UI and an internal Derby database, allowing users to Upload Test Data and View the Results; without being connected to a permanent database.

In the <root> directory of this project there are (2) files:

1. bulkUpload\_SampleData.csv

- This CSV files already contains 100 test records.

2. bulkUpload\_Template.csv

- This CSV file is a template to use for creating your own test records.

To Upload Test Data; after deploying the application following these steps:

1. From the Main Page

2. Click on “Bulk Upload” under Quick Links section

3. Click on “Choose File” and navigate to local file directory where you have stored your bulkUpload\* file with test records; select your file.
4. Click “Upload It”; you should see a message stating “SUCCESS”
5. If you received a message that says “FAILED” then check your bulkUpload\* file to ensure that the format matches the “bulkUpload\_Template.csv”

6. Go back to the Main Page

7. Click on “Search” under Quick Links section

This screen will allow you to view your uploaded test records.
