Hi Mike and the Fire Team X. Welcome. We are glad to be in touch with you and we are willing to help out on subject matter whenever needed. Let's set up some time to discuss more next week. In the interim, just wanted send this mini communication plan and introduce all parties.

Feel free to reach out to any of us and especially our Public Health Informatics Institute (PHII) colleagues, Jim and Natalie, if you need any more information on our current ECR project. Sanjeev and Channah could help you with any Db and synthetic STD data related queries. We could also connect you to informatics and other SMEs as appropriate in the course of your class work. I think most practical thing would be to find some time during the day (Bi-weekly?) where you could have your team representatives discuss it with someone from our group. The person could change depending on what is being discussed but there will be no communication gap among us. I will be there most of the time but Channah or Sanjeev will cover me when I am absent.

Thanks for your interest. Looking forward to talk to you soon.

Subject: Re: Introduction: FHIR Team X

Hello Ninad and Paula,

We are looking forward to working with you! At least 3 of our 4 members would be able to speak or virtually meet with you after 7 PM central on weekdays. Alternatively 1 or 2 of us could speak to you during the day anywhere in the 11 AM - 2 PM central range on weekdays. Weekends are pretty open for at least someone from our team to speak or virtually meet with you if it comes to that. When would be a good time for you to be able to share some information with us to help us get started?

Thank you,
Mike

Hello Team FHIR Team X,

Thank you for participating in the STD Surveillance Project. Your Organizational Mentors (OM) are Ninad and Paula (cc'd) and will share with you the pertinent information you need to get started.

We are opening the lines of communication, so that you can share times to connect. Everyone does not have to be present, if only one team member is able to speak or virtually meet with Ninad and/or Paula that is okay - just be sure to share this information with the team. Team: Please work with your OM's to set a time.

I am your TA mentor. I will be helping to guide you all throughout the semester. Team: If you have questions, specifically for me please post them to Piazza. I have created a Piazza group for us there.

Happy Planning!

Tia
