To run the project, navigate to patient.gradeafhir.pw. From there you can select a user and submit a Healthy Habits questionnaire. Now if you navigate to provider.gradeafhir.pw and select the same patient, you will be able to see the results of this survey under the 'Healthy Habit History' tab. If you click on the referral tab, you will be able to send a referral of your choice to the selected patient. Just select the referral type and click 'Send Referral'. If you now go back to the patient facing app amd click the recommendations menu option, you will see several recommendations based on this referral.
