Team FHIR MDT
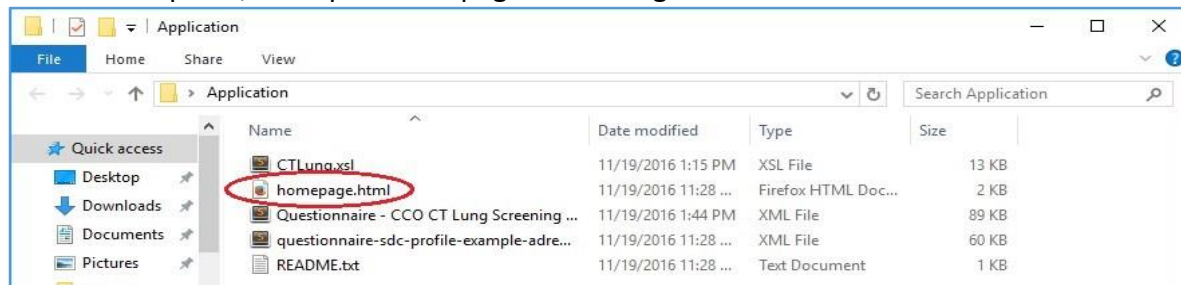

Michael Schepens, Xiaodong Gu, Ken Nguyen, Hasti Ghabel, Matt Powell

Special Instructions

1. Git clone (https://github.gatech.edu/gt-hit-fall2016/Cancer-Laboratory-Reporting) Application folder to your local computer, and open homepage.html using Firefox.

2. **NOTE:** The source questionnaire XML files are being pulled from a local directory for this project. It would be a minor matter to pull them from a central server in the future.

3. **NOTE:** The output QuestionnaireResponse XML files are being generated in compliance with the FHIR QuestionnareResponse standard and displayed on the screen. At this time, we did not have a dedicated State Registry server to send it to. This would be a minor update once a State Registry server was identified.
